

Freedom. Anytime.

Campervans
2027

The open road. A blank sheet. Destination unknown. Bailey campervan ranges are ready and waiting – designed to be the perfect partners on your adventures.

Made for living life in the moment, our Endeavour and Endurance ranges are equipped to take the road less travelled, allowing you the flexibility to go off-grid, unplanned and for longer.

Designed and engineered to be as agile as possible, our campervans allow you to simply pack up and take off, while retaining that feeling of comfort and spaciousness for every stay along the way.

Using Ford’s high-performance engineering as the foundation, our ranges are packed with over 75 years of Bailey knowledge and know-how – with all the little details and big thinking that make us The Nation’s Favourite.

It’s time to follow your instinct, dare to be different and embark on that bucket list trip with a Bailey campervan.

Ready for anything

During design and development, we always push our campervans to unparalleled extremes. So you can do the same.

From the searing heat of the Sahara Desert and Bardenas Reales, to the Arctic temperatures of a cold chamber – these vehicles are more than up to the challenge.

With their Truma Diesel Combi D4E heating and hot water system, our campervans allow for all-season, all-weather comfort. And with the option of added flexibility with Truma solar panels, going off-grid for longer has never been easier.

Get ready to take on the toughest terrain – with a durable Bailey campervan. No adventure is off limits.

Bailey campervans are packed with
practical features and optional extras
to take on any adventure.

Built for Big Adventures

Compact by design, immense in performance, and adventurous by nature, our campervan ranges are primed and ready for any conditions.

Each Bailey campervan is designed and engineered to be agile, so you can simply pack up and take off. They are smart and spacious with every convenience considered and built on a Ford Transit van for plenty of power and comfort.

Our campervans have experienced a range of extreme big trips, from the desert backdrop of the mighty Sahara in Morocco, to the rugged terrain of Bardenas Reales in Spain. We've also taken on the typically wet and windy conditions on the NC500 in the Highlands.

Our many Big Adventures have proved beyond doubt the Bailey range can take on the extremes of terrain and temperature, with no compromise on comfort over long distances.

Scan to see more.

Safe in the knowledge...

Comprehensive testing of all ranges is a standard part of the Bailey manufacturing process.

Every model is built to meet NCC standards and above, with over 500 checks covering four key areas such as 12v, heating, ventilation and gas.

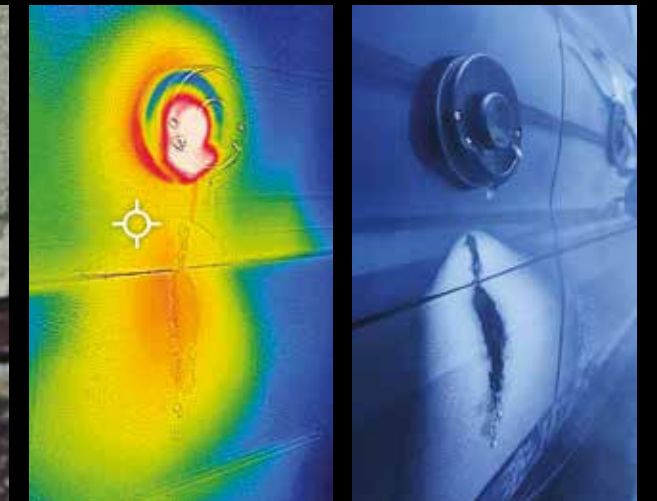

This means every feature is assessed not just for performance but for real-world safety and durability – so you can travel with confidence knowing your campervan meets the exacting standards expected of a leading manufacturer.

Beyond -15°C below

From one extreme to another. Facing the cold climate-controlled chamber head-on, our ranges are up against temperatures of -15°C.

Cold chamber testing quickly separates the good from the great. Plunging our campervans into temperatures that hit -15°C outside whilst maintaining a +20°C inside shows that its construction and materials are more than up to it.

The Ford Pro Convertor Programme recognises premium convertors across Europe that offer expertise and high-quality output at every stage of production. Bailey was the first UK manufacturer to be awarded Ford Pro Convertor status for coach-built motorhomes. We have now extended this prestigious recognition to our campervan range.

To obtain Ford Pro Convertor status, a manufacturer must be able to deliver high-quality products that meet Ford's strict engineering, manufacturing and quality control standards, giving you even more peace of mind when choosing your dream Bailey campervan.

The Ford Pro Convertor accreditation audit undertaken by Ford ensures that Bailey not only meets the required production standards but also offers a comprehensive customer support programme, which includes product performance data analysis and a warranty package comparable with that already provided on the Ford base vehicle.

2-4 Travel Seats

ENDEAVOUR

Follow your instincts

Created for travellers who believe the journey should be every bit as rewarding as the destination, Endeavour II brings comfort, freedom and outstanding value to every escape. From scenic road trips to peaceful coastal stays, it makes every mile feel worthwhile.

With three versatile 6-metre models, Endeavour II combines a comprehensive standard specification with optional upgrades, allowing you to tailor your campervan to the way you travel.

Powered by a 2.0 litre 130bhp Ford engine with six-speed manual transmission, with an optional 165bhp eight-speed automatic, Endeavour II is made for effortless touring. All-weather insulation, Truma diesel heating and a 150Ah lithium leisure battery keep you comfortable for longer, wherever the road leads.

All under 3,500kg, drivable on a standard Category B licence

2-4 Travel Seats

ENDURANCE

Wild at heart

Built for off-road capability and off-grid adventure, Endurance is designed for independent travellers who want the freedom to go further, anytime, anywhere.

With a strong base specification and a wide range of optional extras, Endurance adapts to your lifestyle – offering practical storage, flexible space and everyday usability for couples, families or adventure-led trips.

Powered by Ford's 2.0 litre 165bhp engine and supported by 80Ah AGM leisure batteries and a Truma 130W solar panel, Endurance is ready for life beyond the beaten track – keeping you self-sufficient for longer.

Under 3,500kg and drivable on a standard Category B licence

ENDEAVOUR

Follow your instincts

Worth every mile

130bhp 6-speed manual Ford Transit gearbox (as standard)

165bhp 8-speed automatic gearbox (Optional extra)

Fog lights and front parking sensors

Status 570 television aerial

Panoramic over-cab sunroof

Pre-wired for optional Avtex mobile Wi-Fi system

Rear-view reversing camera and reversing sensors

Exterior sliding door

16" black alloy wheels and under-slung steel spare wheel

Electric Thule side entrance step

The smart move

From Highland roads to quiet coastal stays, every mile will feel worthwhile. The Endeavour range is fully equipped to get you everywhere in comfort – offering a smart balance of affordability, practicality and the freedom to make each journey an adventure.

Powered by a 2.0 litre 130bhp Ford engine with six-speed manual transmission, Endeavour delivers confident performance as standard. For added power and effortless driving, opt for the 165bhp engine with eight-speed automatic transmission, alongside a range of extras designed to tailor your Endeavour to the way you travel.
